

What is Targeting in KakaBot

One of Most important part in KakaBot is Targeting, using The Targets That you enter our Bot Know who to Follow, UnFollow, Like, Comment or DM.

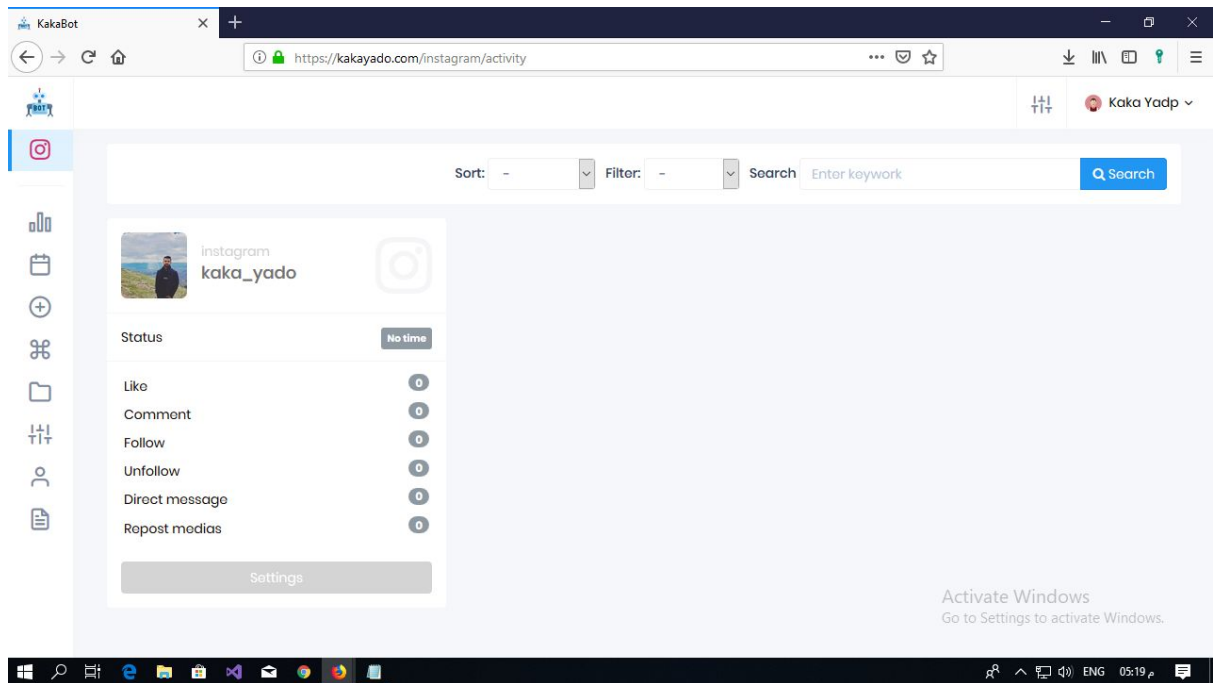

1. **Tags:** This will Target People That following,Liking or Commenting in specific Tags some Tags Example (love, gaming, Pubg.....)
2. **Location:** This will Target People By Them Location
3. **Username:** This Will Tag People That following or followers of specific user for example (if you choose Ronaldo in Username Bot Automatically will Target his Followers)

How to Use It

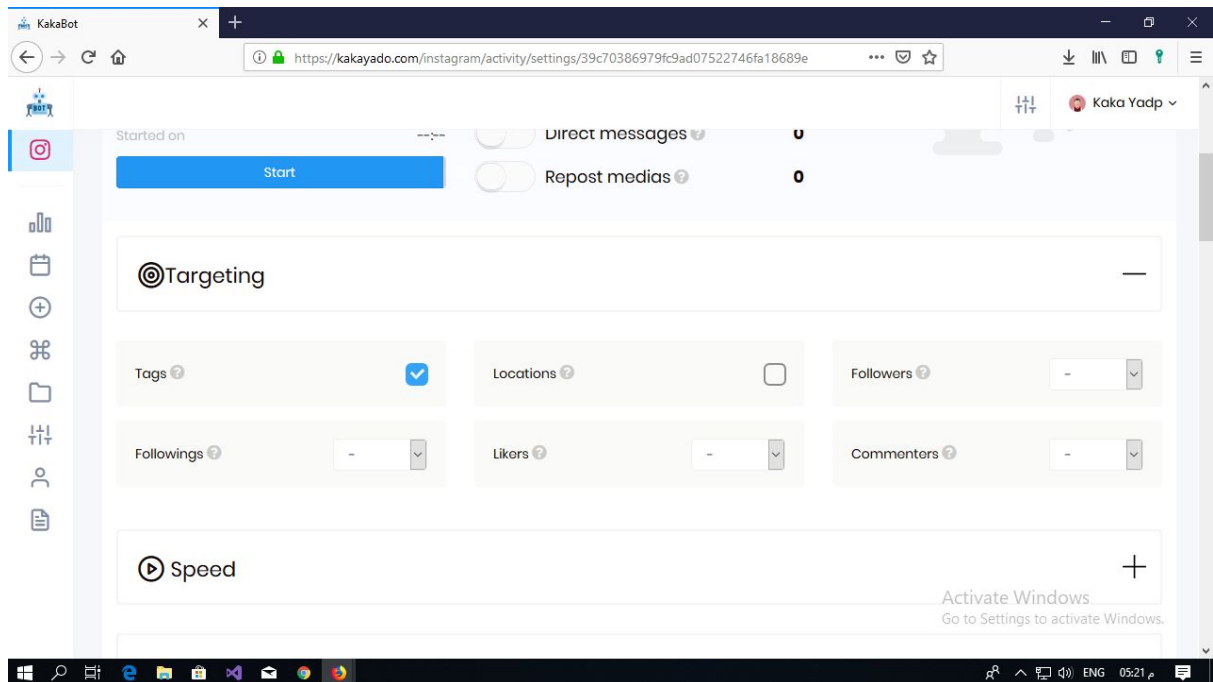

1. From Dashboard go to Auto Activity

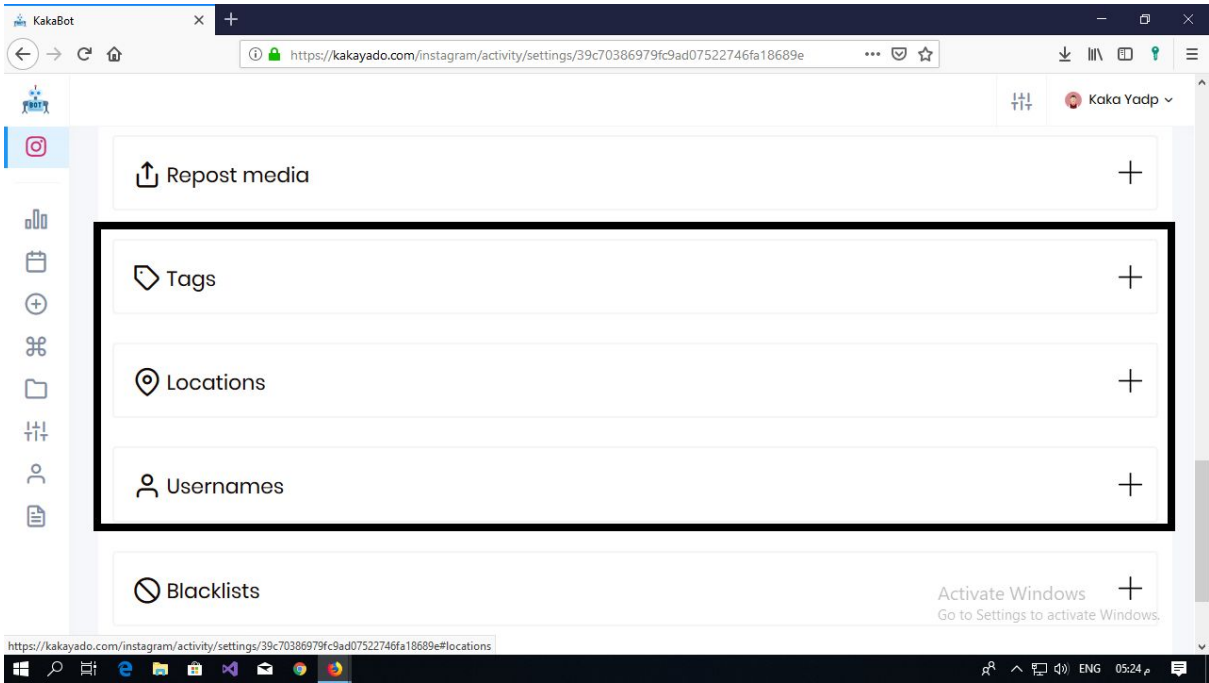

2. Choose The Account and press on Settings

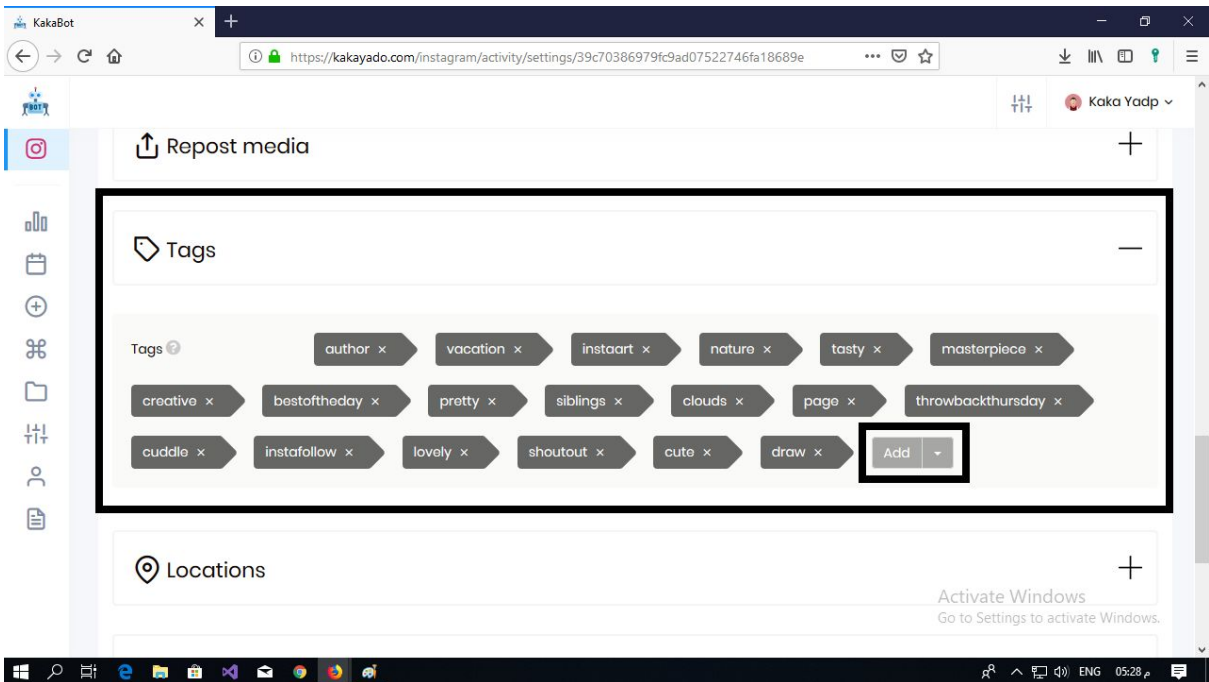

3. Scroll Down to Targeting and Check What You want to Target

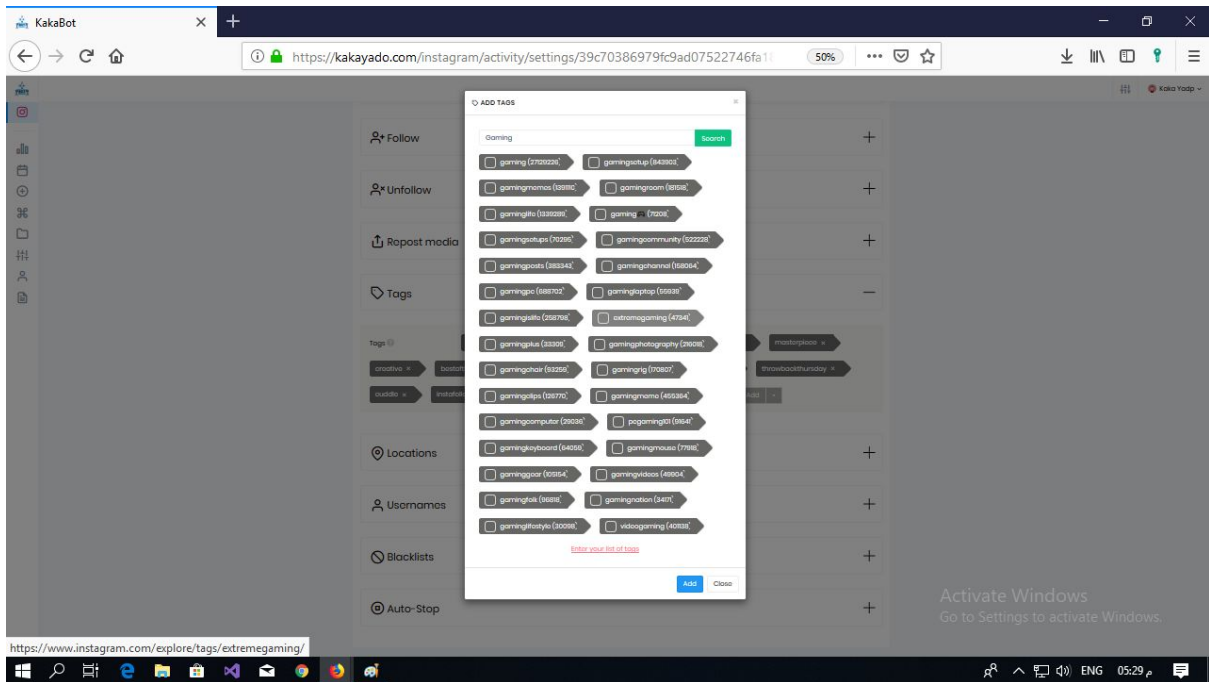

4. Scroll Down and Open Sections That you need to edit.

5. Click on X to remove Tags or ADD to add new Tags

6. Type The Tag and click on Search then check the tags that you want to add then press on Add

7. Do Same things for Location and Usernames (if needed)
